

Anaptyx CivicConnect - Municipal Wi-Fi Without the Municipal Burden

Zero Upfront Cost | Zero Extra IT Load | 10-Year BEAD Compliance Covered - Launched Sept 15

THE PROBLEM YOU SOLVED	HOW CIVICCONNECT SOLVES IT	WHAT YOU GET
You won BEAD funding. Now you face IT overload, council CAPEX fights, and a 10-year federal compliance obligation you didn't sign up to manage.	1. No IT Burden: Fully managed, segmented network. 24x7 NOC, helpdesk, patching. 2. Zero Upfront: No hardware/install CAPEX. Flat BEAD-eligible OPEX fee. 3. Compliance Included: We handle FCC/BDC reporting, speed tests, uptime logs, affordability docs.	• Live in 30-45 days • <30 min/month from your staff • Audit-ready compliance packet quarterly • SLA tied to BEAD 100/20 Mbps • Hardware refresh included

Objection Quick Answers for Council

"IT is overwhelmed"	We take it OFF their plate. Isolated network, no internal access, single dashboard.
"What's the catch on zero upfront?"	No catch. We capitalize hardware, you pay BEAD-eligible OPEX. No bond, no CAPEX vote.
"Who owns the 10-year risk?"	We do. SLA-backed compliance, we document and remediate at our cost.

Pilot Offer: One park / downtown corridor live in 30 days, zero upfront, zero IT burden. If IT signs off, we scale citywide. | **Contact:** Anaptyx CivicConnect Team | civicconnect@anaptyx.co | 24x7 NOC
