

O2 Chamber Hub

PREPARE AT YOUR OWN PACE

Your Hyperbaric Chamber Buyer's Checklist

Use these questions during your research or first consultation. Check off what you have clarified and keep notes on what you want to explore.

☐ My setting and priorities

Home, wellness, or professional setting? Who will use the chamber? What matters most for comfort and access?

☐ The room and access route

What space, ceiling height, clearance, ventilation, and electrical supply does the exact model require? Can it reach the room through the full delivery route?

☐ The exact chamber and configuration

What model and version is proposed? What pressure capability, oxygen-delivery arrangement, equipment, and accessories apply?

☐ Written information to review

Can I receive the manufacturer's specifications, operating instructions, maintenance guidance, and applicable safety documentation?

My first conversation

Model(s) to discuss:

Preferred timing:

O2 Chamber Hub

BEFORE YOU COMMIT

Clarify the purchase and ongoing support.

☐ A complete written proposal

What is included, optional, or priced separately? Confirm configuration, delivery, setup, training, room preparation, applicable taxes, and other costs.

☐ Delivery and handover

Who handles transport and placement? What access assumptions apply? Does delivery include setup, testing, or training, and who is responsible for each?

☐ Training and safe operation

Who provides model-specific instruction? What written guidance, operating rules, and maintenance schedule will I receive?

☐ Warranty and service

What is covered and excluded? Who handles a claim? Ask about labor, parts, shipping, response arrangements, and any extended warranty terms.

☐ Timing and order terms

What lead time, payment stages, order-change terms, and cancellation conditions apply to my exact order?

Questions still open

This checklist supports equipment research, not medical decisions or operating instructions. Discuss personal suitability with a qualified healthcare professional and follow the manufacturer's instructions for the specific system.
